

LAYOUT MED CSS (2)

LAYOUT MED CSS (2)

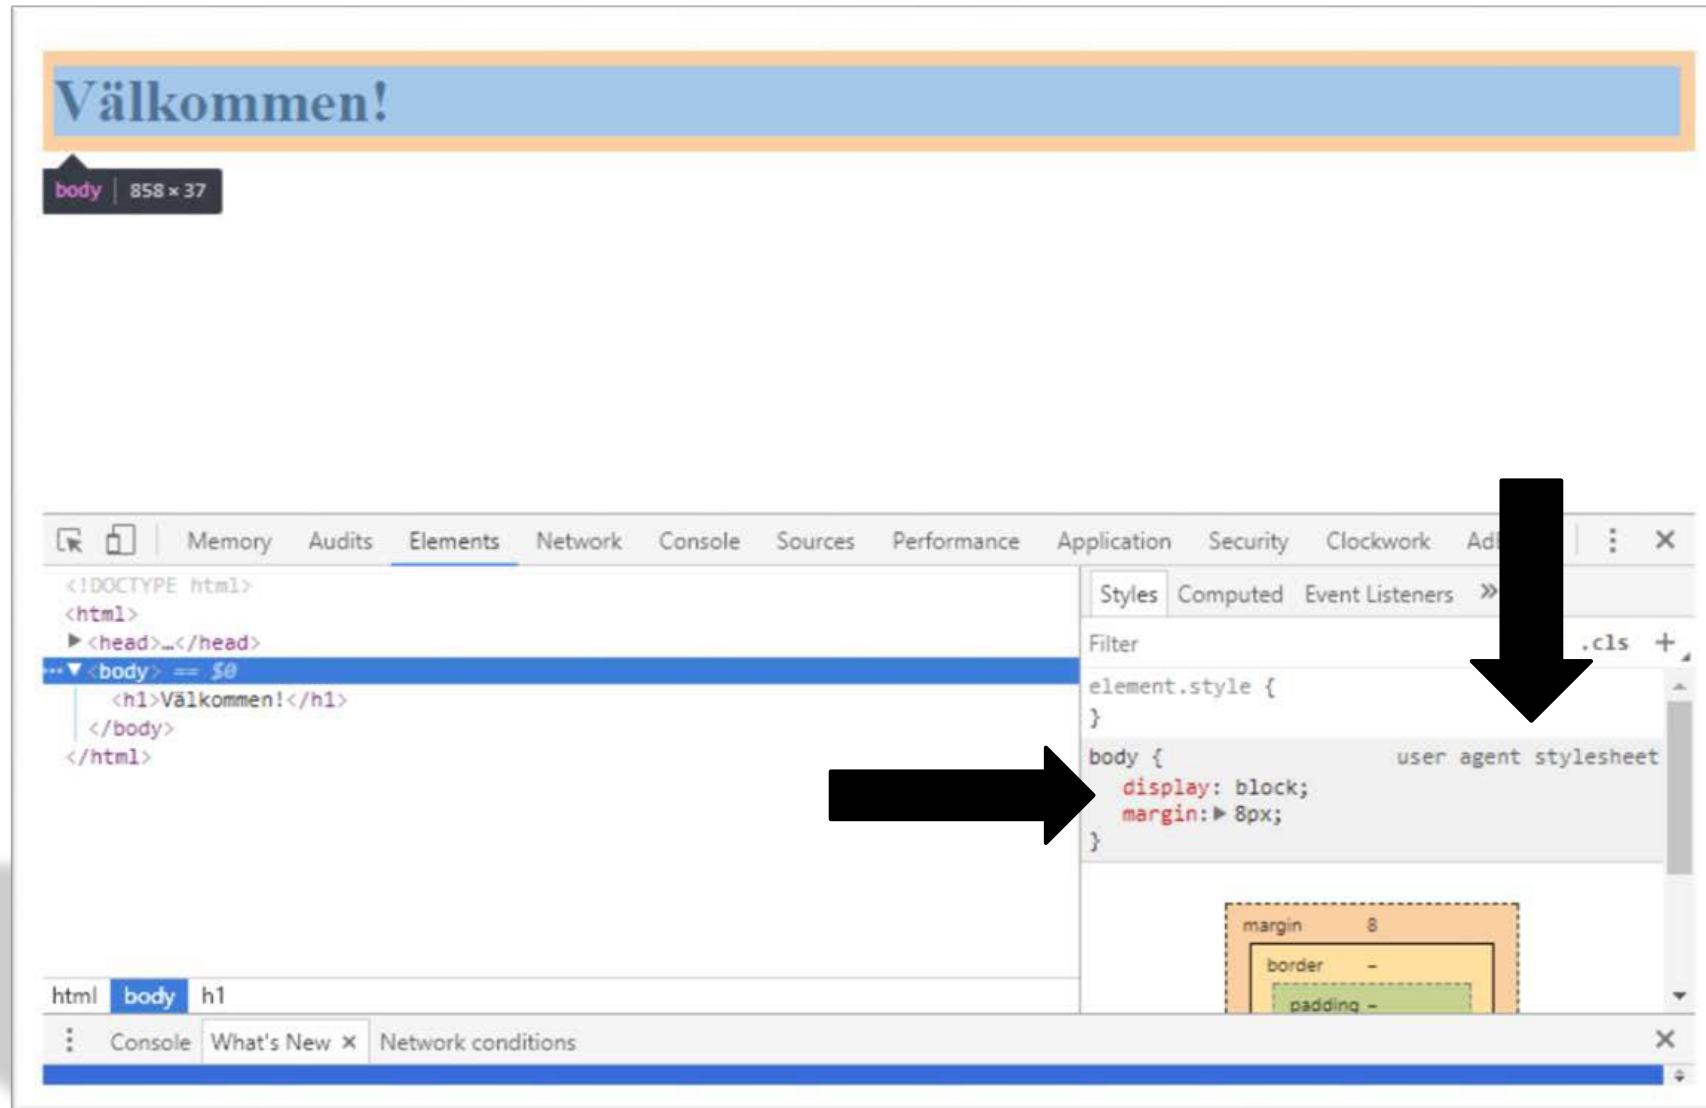

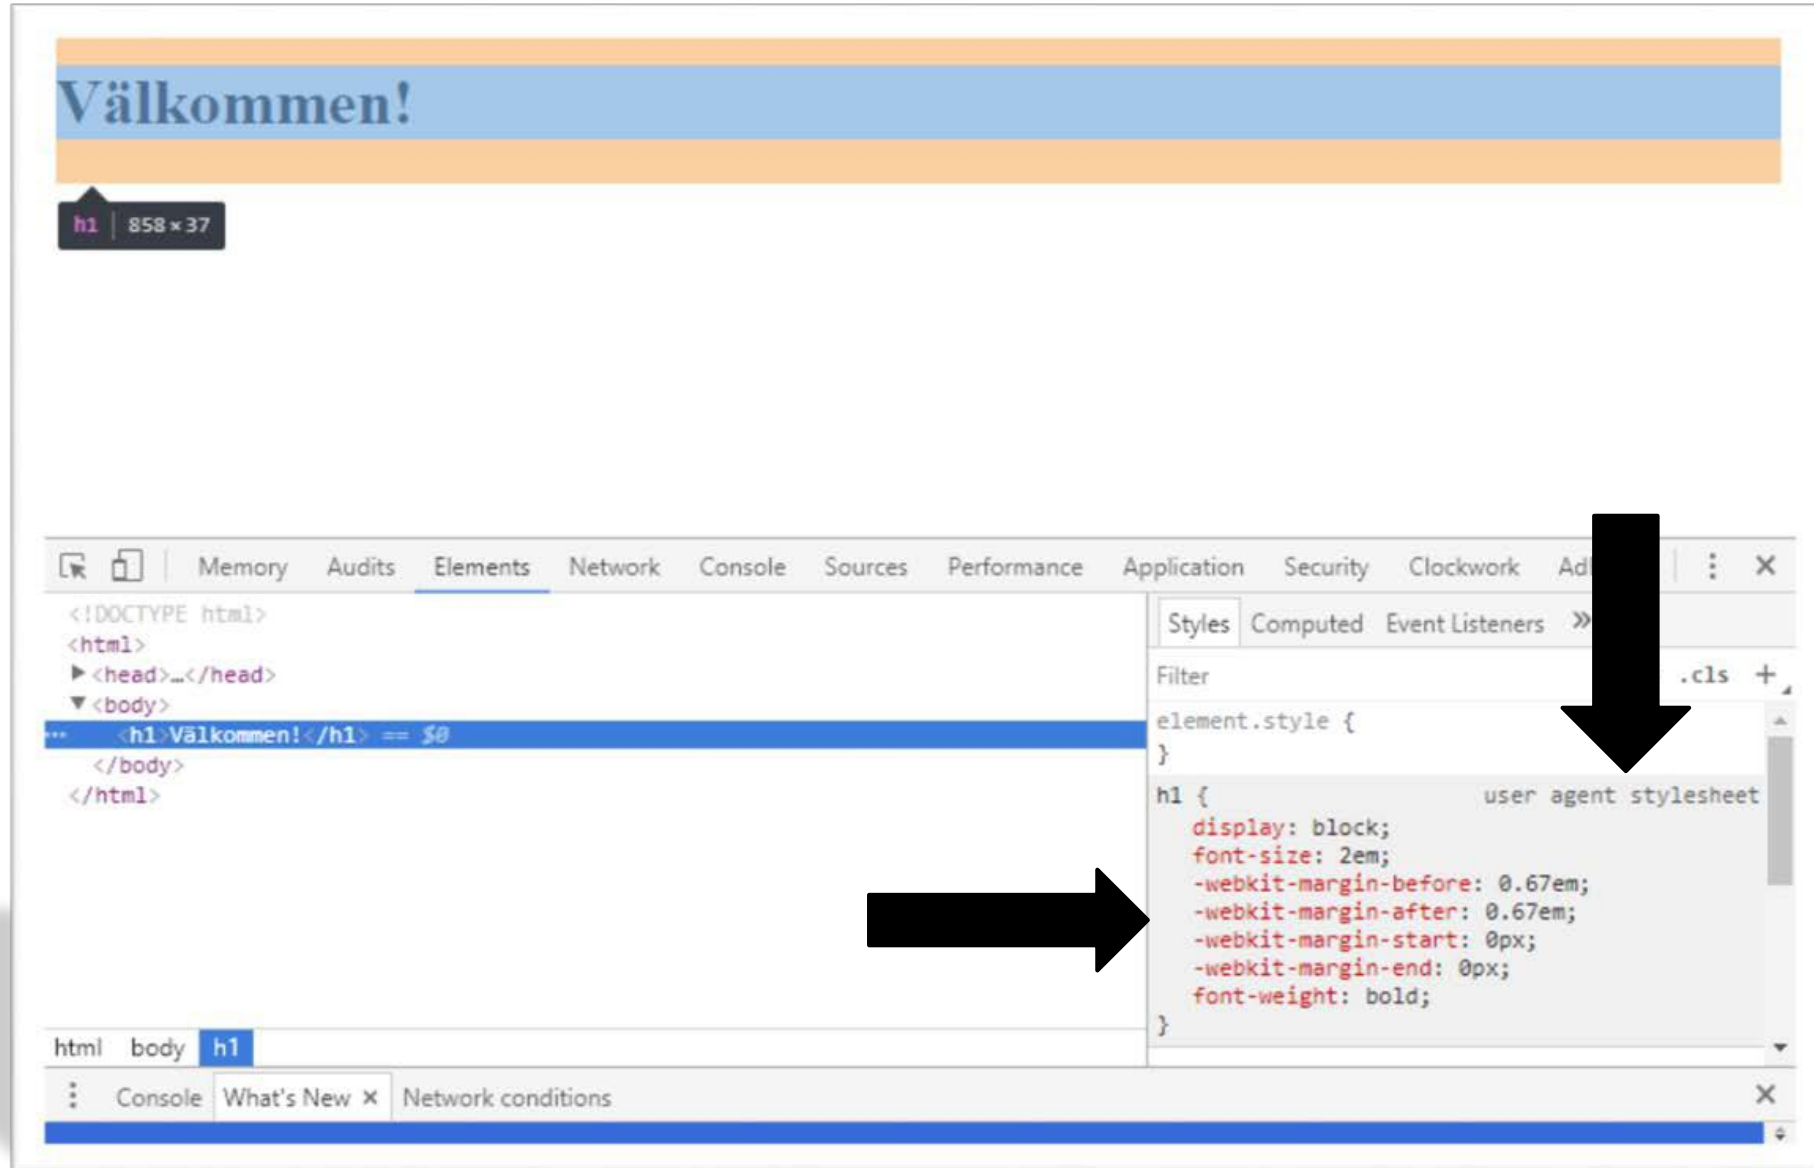

Dagens agenda

- Tips och trix kring CSS
 - CSS reset
 - Repetition av arv
(och viktighet av CSS-regler)
 - ”Nya” CSS 3-egenskaper
 - CSS-animationer
- Layout med Flexbox
- Layout med Grids

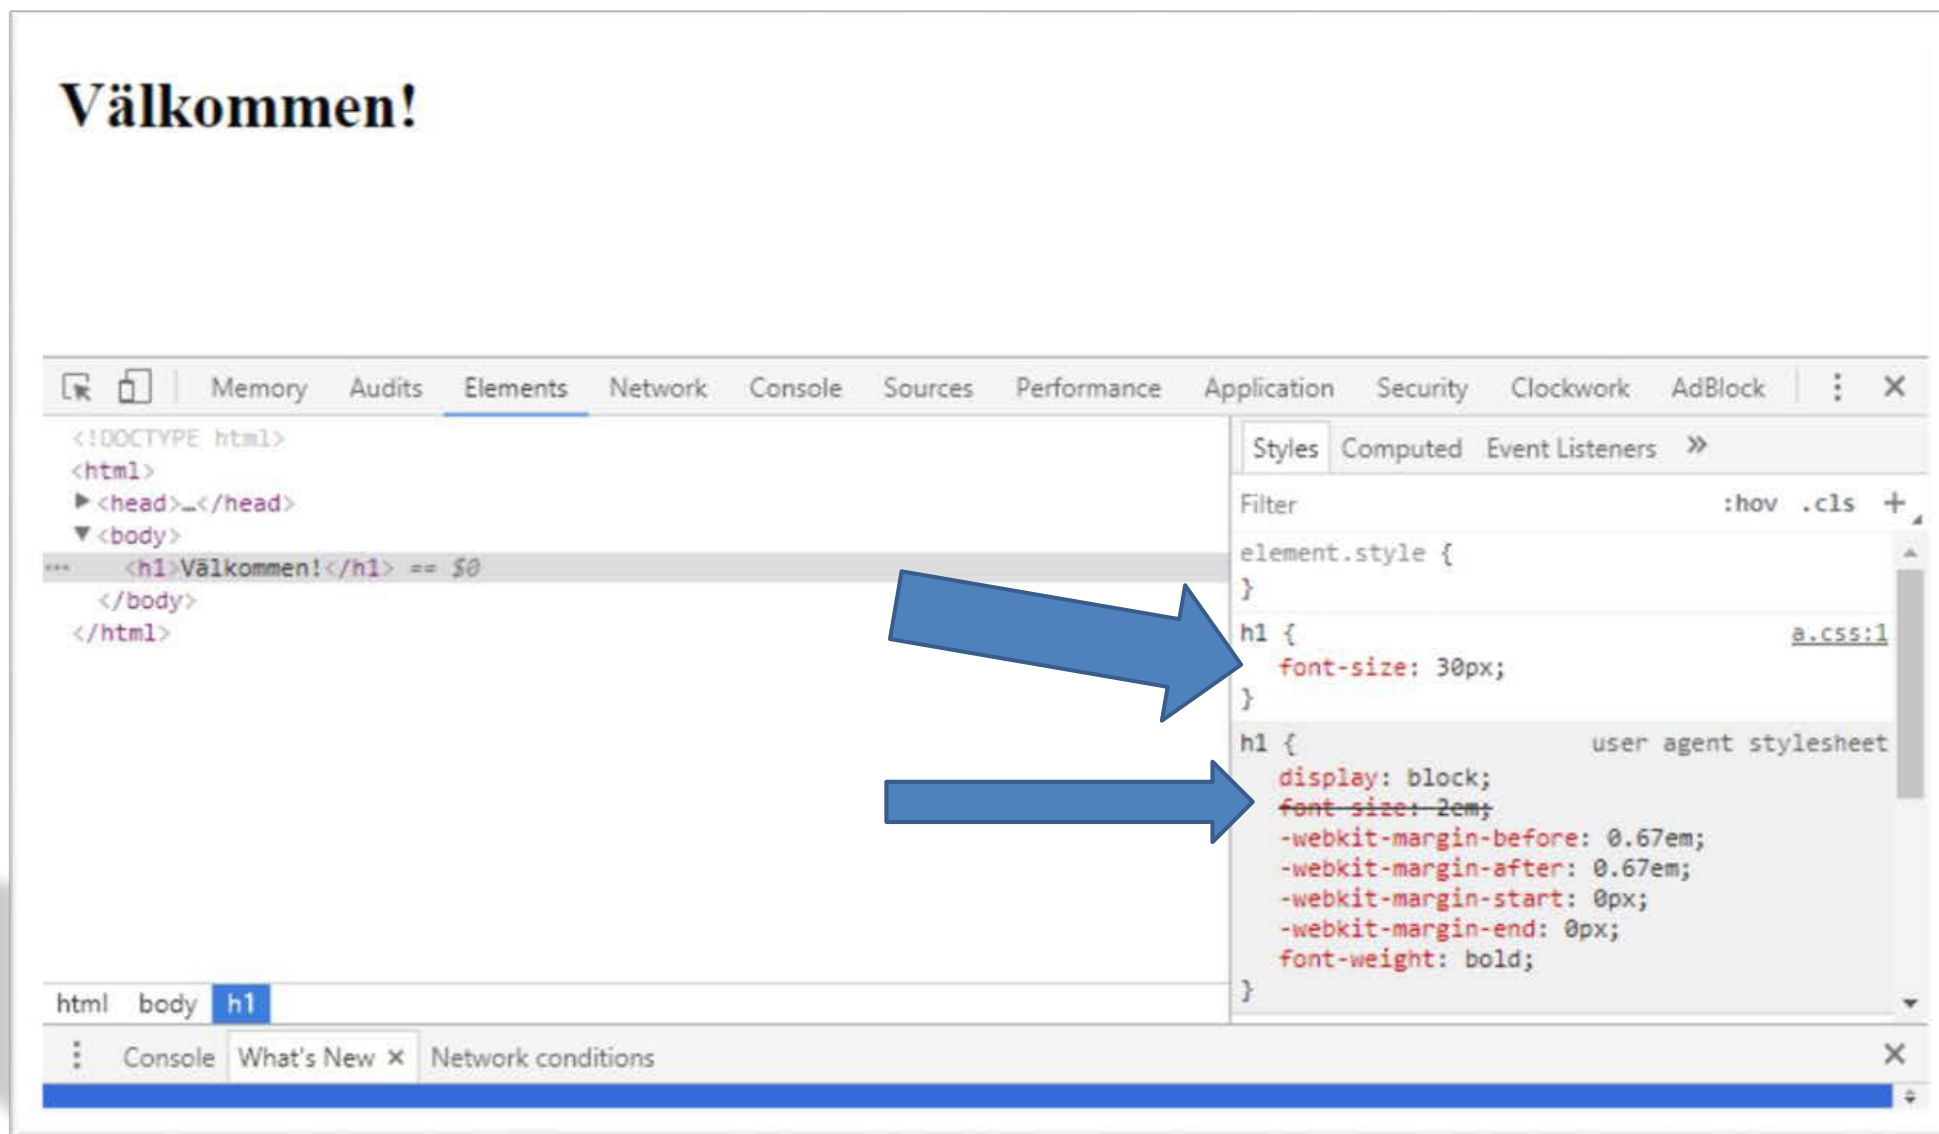

Förinställda CSS-regler för webbläsaren

Förinställda CSS-regler för webbläsaren

Att skriva över webbläsarens evenaskaper?

MEN DETTA ÄR JU JOBBIGT – HUR
VET JAG ALLA WEBBLÄSARENS
FÖRINSTÄLLDA CSS-EGENSKAPER?

... och hur ändrar jag dessa?

CSS: reset?

World Wide Web

The WorldWideWeb (W3) is a wide-area [hypermedia](#) information retrieval initiative aiming to give universal access to a large universe of documents.

Everything there is online about W3 is linked directly or indirectly to this document, including an [executive summary](#) of the project, [Mailing lists](#) , [Policy](#) , November's [W3 news](#) , [Frequently Asked Questions](#) .

[What's out there?](#)

Pointers to the world's online information, [subjects](#) , [W3 servers](#), etc.

[Help](#)

on the browser you are using

[Software Products](#)

Console What's New Network conditions

CSS reset

Fördelar

- Full kontroll över sin CSS-kod
- Tar bort ev. skillnader mellan webbläsare

Nackdelar

- Mer kod att skriva, då vi ej använder den ”färdiga” koden webbläsaren
- Man måste tänka på att formge *alla element* som ska formges.
 - är nu inte fetstilt, t.ex.
 - Listor har inga nummer/punkter
 - Etc.

ATT HÅLLA KOLL PÅ VILKA EGENSKAPER SOM GÄLLER

Inte alltid så enkelt som man tror!

Selector	Example	Example description	CSS
<i>.class</i>	<i>.intro</i>	Selects all elements with class="intro"	1
<i>#id</i>	<i>#firstname</i>	Selects the element with id="firstname"	1
<i>*</i>	<i>*</i>	Selects all elements	2
<i>element</i>	<i>p</i>	Selects all <p> elements	1
<i>element,element</i>	<i>div, p</i>	Selects all <div> elements and all <p> elements	1
<i>element element</i>	<i>div p</i>	Selects all <p> elements inside <div> elements	1
<i>element>element</i>	<i>div > p</i>	Selects all <p> elements where the parent is a <div> element	2
<i>element+element</i>	<i>div + p</i>	Selects all <p> elements that are placed immediately after <div> elements	2

JU MER SPECIFIK EN SELETOR ÄR,
JU HÖGRE PRIORITERAS DEN

CSS3 Modules

CSS3 has been split into "modules". It contains the "old CSS specification" (which has been split into smaller pieces) and new modules are added.

Some of the most important CSS3 modules are:

- Selectors
- Box Model
- Backgrounds and Borders
- Image Values and Replaced Content
- Text Effects
- 2D/3D Transformations
- Animations
- Multiple Column Layout
- User Interface

Most of the new CSS3 properties are implemented in modern browsers.

```
49 }
```

```
50
```

```
51 .animate {
```

```
52     display: -webkit-flex;
```

```
53     display: -moz-flex;
```

```
54     display: -ms-flex;
```

```
55     display: -o-flex;
```

```
56     display: flex;
```

```
57 }
```

```
58
```

LAYOUTER - HISTORIK

ONE DOES NOT SIMPLY...

**KNOW HELL UNTIL THEY'VE TRIED
WEB DEVELOPMENT WITH CSS**

CSS

IS

AWESOME

CSS 1: 1996

- Formatera text (typsnitt, fetstilt, kursivt)
- Färg för text och element
- Textattribut (avstånd mellan ord, mellan rader, etc.)
- Placering av element (text, bilder, tabeller, m.m.)
- Marginaler, "luft" (padding), ramar, positionering
- M.m.

CSS 2: 2004

- Positionering: Absolute, fixed, relative
- Z-index
- Nya text-egenskaper (t.ex. skuggor)

CSS 2.1: 2007 (2009, 2011)

- Media typer
- Visuella effekter
- Tabeller
- Bättre selektorer
- M.m.

CSS 3: ?

- Bättre selektorer
- Media Queries
- Kolumner
- Flexibel layout
- Grids layout
- M.m.

FLEXBOX

I'm Centered!

This box is both vertically and horizontally centered. Even if the text in this box changes to make it wider or taller, the box will still be centered. Go ahead, give it a try. Just click to edit the text.

Sticky Footer

Click the button below to hide the contents of this page. Notice how the footer sticks to the bottom of the window even when there's not enough content to fill the page.

 Toggle Contents

Nested Media Objects

Media Object Title

Phasellus vel felis purus. Aliquam consequat pellentesque dui, non mollis erat dictum sit amet. Curabitur non quam dictum, consectetur arcu in, vehicula justo.

Mauris porta arcu id magna adipiscing lacinia at congue lacus. Vivamus blandit quam quis tincidunt egestas. Etiam posuere lectus sed sapien malesuada molestie.

Basic Grids

The grid cells below do not specify any widths, they just naturally space themselves equally and expand to fit the entire row. They're also equal height by default.

1/2		1/2	
1/3	1/3	1/3	1/3
1/4	1/4	1/4	1/4
Full-height, even when my content doesn't fill the space.		Lorem ipsum dolor sit amet, consectetur adipiscing elit. Vestibulum mollis velit non gravida venenatis. Praesent consequat lectus purus, ut scelerisque velit condimentum eu. Maecenas sagittis ante ut turpis varius interdum. Quisque tellus ipsum, eleifend non ipsum id, suscipit ultricies neque.	

Vad är flexbox?

- Ett sätt att positionera ut element på en webbsida
 - Ett alternativ till att använda t.ex. float för att bygga layouter
- Flexbox utgår från att positionerna ut barn-element i en "container" på olika sätt.

Om Flexbox

Fördelar

- Enkelt att anpassa elements storlek efter dess innehåll
- Enkelt att centrera element (vertikalt & horisontellt)
- Enkelt att sätta i vilken ordning som element ska visas

Nackdelar

- Dåligt stöd för äldre webbläsare, även ”nyare” versioner av IE (IE 11 har stöd)
- Svårt att bygga ”bra” layouter, mer för att strukturera innehåll

 - CR

Support includes all properties prefixed with `flex`, as well as `display: flex`, `display: inline-flex`, `align-content`, `align-items`, `align-self`, `justify-content` and `order`.

% of all users

$$96.71\% + 1.74\% = 98.45\%$$
$$96.57\% + 1.28\% = 97.85\%$$

```
#container{  
  background-color: lightblue;  
  padding: 20px;  
  /* Egenskaper för flexbox */  
  display: flex;  
  align-items: baseline ;  
}  
  
.item{  
  text-align: center;  
  background-color: orange;  
  margin: 10px;  
  padding: 40px;  
}  
  
.item:nth-child(odd){  
  height: 100px;  
}  
  
.item:nth-child(even){  
  padding-top: 60px;  
}
```

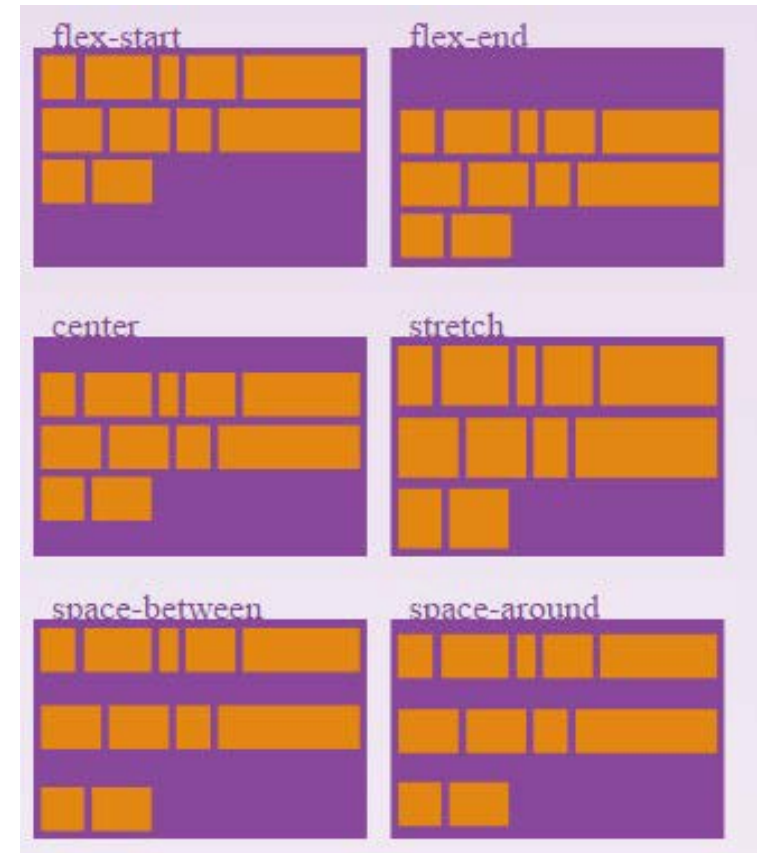

#container

- Används bara vid flera rader

```
.container { align-content: flex-start | flex-end | center |  
space-between | space-around | stretch; }
```

CSS Grid Layout (level 1) - CR

Method of using a grid concept to lay out content, providing a mechanism for authors to divide available space for layout into columns and rows using a set of predictable sizing behaviors. Includes support for all `grid-*` properties and the `fr` unit.
